EDUCATION

NACKADEMIN (YH) — **Solna, Sweden**
Java Developer — **2023 - 2025**

PROFESSIONAL EXPERIENCE

DIBZ — **Stockholm, Sweden**
Junior Backend Developer — **Jun. 2026 - Present**

- Developed and maintained backend solutions in **Python**, working with **Selenium**, **Requests** and **Cron Jobs** for automation and user flows.
- **Responsible** for monitoring login and registration queues, troubleshooting issues and finding solutions when changes or errors affected the flows.
- Used **AWS CloudWatch** for log monitoring and troubleshooting, and **AWS S3** to manage images linked to queues.
- Used **Postman** to manage and update queues, including activating, deactivating, creating and editing queues.
- Worked in **two-week sprints** with **sprint planning**, regular team meetings, **tech syncs** and **tech demos**.

APCOA — **Stockholm, Sweden**
Full-Stack Developer (Internship) — **Oct. 2024 - Apr. 2025**

- Developed an **AI-powered customer service chatbot** using **OpenAI GPT** with **function calling** capabilities.
- Built a **mobile application** from scratch during the internship period
- Enabled **real-time data handling** and **automated generation of email templates**
- Performed **testing** across multiple environments to ensure quality and reliability
- Produced **UI/UX mockups** with a focus on **user-centered design**. Integrated **external APIs** into the application
- Designed **database schemas** and **ER diagrams** for structured data management
- Worked full stack with **C#**, **TypeScript**, **Angular**, HTML, and **CSS**.

PROJECTS

Dev Portfolio (Frontend) — **Angular, TypeScript, GitHub Pages, GitHub Actions**

- Built a personal portfolio in **Angular** showcasing my experience, skills and **my projects**.
- Implemented support for Swedish and English as well as dark and light themes, with **settings** that persist between visits.
- Published the site on **GitHub Pages** with **automatic deployment** via **GitHub Actions** on every push.

Football Tournament Simulator (Frontend) — **Angular, TypeScript, GitHub Pages, GitHub Actions**

AIChatBot (Backend) — **C#, ASP.NET Core, .NET 8, OpenAI API**

AIChatBot (Frontend) — **Angular, TypeScript, Angular Material**

TECHNICAL SKILLS

Backend: Python | Java | C# | .NET | C++ | Spring Boot | REST API | Selenium | Requests | Cron Jobs
Databases: PostgreSQL | MySQL | SQL | Redis
Frontend: Angular | Angular Material | React | TypeScript | JavaScript | HTML | CSS
Cloud & DevOps: AWS (CloudWatch, S3) | Docker | Kubernetes | GitHub Actions | Cloudflare Workers | Azure
Integrations & Ways of Working: OpenAI API | Sinch | Infobip | Postman | Scrum

ADDITIONAL INFORMATION

- **Languages**: Swedish/English: native / fluent professional level | Arabic: good spoken level
- **Personal Details**: Swedish citizen, B driving license
